

Decontamination, Treatment, and Volume Reduction of Large Metallic Objects

LALP-98-1266 June, 1998

Contact Ellen Stallings Project Leader Los Alamos National Laboratory (505) 667-2236

Purpose

Science and Technology

- **Large Scale Demonstration and Deployment**
- Ł Address the need for cost-effective and reduced risk technologies for characterization, treatment, and volume reduction large metallic objects

Approach

- Ł Baseline is ASTD project on "Decontamination and Volume Reduction of Gloveboxes" − side-by-side comparison
- Ł Currently available, demonstrated technologies
- Ł Minimum 30% cost sharing

Benefits

- **L** Deploy most effective technologies Industry Partners
 - Ł <u>IT Corp.</u>; Florida International University; ICF Inc.; AEA Technology; BNFL Inc.; NFS Corp.
